BACK of each Parker product shown on the following pages is over 35 years of Mr. Geo. S. Parker's personal experience in the fountain pen business, a modern plant with the most up-to-date and efficient machinery obtainable, and a fine organization of skilled workmen imbued with one idea—to make the finest writing instruments in the world.

Geo. S. Parker

**Non-breakable
Barrels**

Parker Duofolds have been taken from an airplane 2,000 feet above without breaking to prove the non-breakable quality of Parker's Pressureless Barrels.

**Heavy Gold Points
Pressureless Touch**

Heavy Gold Points with knifegrind, eight-angled system tips. Pressureless Touch—exclusive combination with pressureless barrel by Parker's special hand-ground ink channel in the slot.

**Libre Two Pens
In One**

Instant convertibility—pocket pen to desk pen and vice versa. Makes two pens in one by attaching every Parker Pen either to buy a Desk, Desk Set.

**27-4% Greater Ink
Capacity**

Parker Duofold's average ink capacity—17 1/2 lines—more than the average of other pens, size for size—this Parker stop-stop writing makes other brands of pens with small ink lines obsolete.

World's Largest Selling Pen

Parker products have served the world for over 35 years, and have been constantly improved with new materials, new methods, new inventions. Today Parker Duofold Pens have reached such a state of perfection, we guarantee them for life.

The desk sets come in a wide range of sizes, shapes and materials and are the only ones offering instant convertibility—pocket to desk set.

Select the Proper Point

Nothing is more personal than a fountain pen. Nothing gives the user greater satisfaction than a properly selected point in a thoroughly reliable pen. On the other hand, nothing gives more distress and annoyance than a point not fitted to the user's hand, or a pen which does not work due either to carelessness or misuse.

There are six Parker points you can choose from—Extra Fine, Fine, Medium, Broad, Stub and Oblique.

For close figure work, or fine memoranda, for general correspondence, for the individual who holds his pen edgewise, or for the one who slants his pen noticeably to the right or left, PARKER makes the proper point.

Button Filler

No lever or hole through side of pen barrel to disengage it. No ink cap to rubber stop to roll off. No ink case leak and avoid extra trouble. To fill completely—unscrew top, press button down gently, replace cap and screw top before withdrawing pen from ink.

Leak Proof

Parker's Dual Valve Safety Cap automatically seals the pen point. No ink can get out. No air can get in. There is no other cap world is made, when sliding pen.

25% Lighter Than Rubbers

Parker's automatic material makes a pen that your hand never tires of holding.

Parker Duofold Pens Are Guaranteed For Life

This generous guarantee is indicative of inherent quality, precision workmanship and belief that every owner of a Parker Duofold Pen has a right to expect perfect service from that pen, rather than simply a willingness to adjust minor troubles. Everything has been done to make Parker Pens as perfect as human care and intelligence can make them, and Parker's Guarantee for Life is the gold seal of that endeavor.
